**Thursday 10/6**

**Women’s Tennis**
vs. St. Joseph’s 3 p.m.

The creators also took into consideration suggestions and comments from outside sources including administrators, student athletes and alumni.

So far, administrators have been receptive to the new site as they feel it is easier to navigate. The new design makes Rider’s website a one-stop information center. As technology changes, so too will the athletics website. It is a work in progress that will surely evolve.

The more you get used to Rider’s main site, the quicker you’ll be able to navigate the athletics site. The best thing about the new site is that the school logo of the Bronc wearing a Rider sweater and leaning on a horseshoe does not appear in the banner on every single page. Hopefully, that logo is the next thing on Rider’s plans to be remodeled.

With time, many will come to love the new website and it will be visited just as much as the old one. If you don’t visit the site to obtain information about your favorite Rider athletic program, then at least visit for the sake of all the people involved on this project. But, if you’re still reading, then the new site should be added to your favorites.

---

**‘Design’ Continued from p. 1**

Students, student athletes, coaches, administration, parents, fans and alumni alike visit the website.

Banners, photos, a side-bar similar to the University’s webpage and game stories are some of the most noticeable differences in the new design. Students can now use the menu bars available at the top of the university page while on an athletics page now for easy navigation. Also included on the new website is a clear sidebar for intramural and club sports. There are no more pop up windows to struggle through. The new site will still offer live broadcast and live stats for basketball.

However, one major disappointment with the new website is the lack of links to the Metro Atlantic Athletics Conference (MAAC) website and some of the other links fans found useful on the old site. These will probably be added in the near future.

The creators of the new design took into consideration the design and content of over 250 college athletics sites. Rider wanted to make its website unique in that it looks just like the University’s main page. The creators also took into consideration suggestions and comments from outside sources including administration, student athletes and alumni.

So far, administrators have been receptive to the new site as they feel it is easier to navigate. The new design makes Rider’s website a one-stop information center. As technology changes, so too will the athletics website. It is a work in progress that will surely evolve.

The more you get used to Rider’s main site, the quicker you’ll be able to navigate the athletics site. The best thing about the new site is that the school logo of the Bronc wearing a Rider sweater and leaning on a horseshoe does not appear in the banner on every single page. Hopefully, that logo is the next thing on Rider’s plans to be remodeled.

With time, many will come to love the new website and it will be visited just as much as the old one. If you don’t visit the site to obtain information about your favorite Rider athletic program, then at least visit for the sake of all the people involved on this project. But, if you’re still reading, then the new site should be added to your favorites.
