Red Alert

Suspects unknown plans for the new Residence Hall in Hill sometimes called in by a student on April 10 and Sunday, April 11. Jamal Mosley spoke about the year’s events, which has been going on for weeks.

He mentioned that the event is a call to action for the community to come together and take a stand against crime. The event is called a Red Alert, and it is designed to mobilize the entire campus community to address the issue of crime and safety.

According to Mosley, the Red Alert was devised not only to get students and faculty involved but also to bring attention to the issue of crime on campus.

He acknowledged the efforts of the Residence Life Office and the Department of Public Safety in addressing the issue, but he emphasized the need for a collective effort from all members of the campus community.

Mosley urged everyone to be vigilant and to report any suspicious activity to the appropriate authorities.

The Red Alert is a call to action for the campus community to come together and stand against crime. It is a reminder that everyone has a role to play in creating a safe and secure campus environment.

Math conference to be held at Rider

The Student Government Association (SGA) elections, held on April 8, was the first event of the year for the new Residence Hall in Hill. The event was designed to offer new options and challenges to the students.

Installation of the new Residence Hall in Hill will be taking place (top). Rider has entered Phase I of a student-centered Master Plan, which calls for the construction of a new residence hall and renovations to current residence halls. The floor plan for Keen’s (bottom).

security Briefs

By David Macarr

As reported by The Chronicle of Higher Education, the Federal Communications Commission (FCC) this week announced the first phase of its plan to extend Internet service to rural areas. The plan will provide a minimum of 25 Mbps for all rural households by 2020. The plan will be funded through a combination of government and private sector sources.

The FCC's plan is part of a broader effort to bring high-speed Internet access to all Americans. The agency has set a goal of ensuring that every American has access to broadband Internet service by 2015. The plan builds on the FCC's existing programs, which have already brought broadband service to more than 20 million Americans.

While the plan faces challenges, including funding and technical issues, it represents a significant step forward in ensuring that all Americans have access to high-speed Internet service. The FCC's effort is critical to ensuring that Americans have the tools they need to participate in the digital economy and to realize the many benefits of broadband connectivity.

TTAC to tap into Internet

TTAC will focus on emerging trends, such as cloud computing, and its impact on society and the economy. The conference will bring together experts from industry, government, and academia to discuss the latest developments and to identify opportunities for collaboration.

The conference will feature keynote speakers, panel discussions, and technical sessions. Some of the topics that will be covered include cloud computing, cybersecurity, and the Internet of Things. The event will also include a poster session and a exhibit area.

The conference is open to all interested parties, including researchers, practitioners, and policymakers. Registration information and details on how to participate will be available on the conference website.

TTAC is a unique event that brings together experts from different fields to discuss the latest developments in cloud computing and its impact on society and the economy. The conference is a great opportunity to learn about the latest trends and to network with other experts in the field.

The second annual Battle of the Buildings (BOB) ran smoothly through the month of April. With number of students attending the BOB event last year, the event was deemed a success. This year, the BOB event was expanded to include the entire campus.

The BOB event was created to promote healthy competition among the Residence Halls on campus. The event involved a variety of activities, including a scavenger hunt, a quiz bowl, and a talent show.

The event was a success, with more than 100 students participating. The winning Residence Hall received a trophy, and all participants received certificates.

The BOB event is a great way to promote healthy competition among the Residence Halls on campus. The event is open to all students, and everyone is encouraged to participate.
