"I think of students as potential entrepreneurs," Mosley said. "A student can get involved in a business of any kind and they are able to have the opportunity to develop their own business."

While Mosley was a student at Rider, he and other students were able to start a business that sold T-shirts and other goods. Mosley said that he was able to start the business because he had the opportunity to learn about the business world and how to run a business.

"I feel confident that when the building opens up and we move into it, the business will be successful," Mosley said. "The students are excited about it and they are ready to start the business."

The new student center will be located in the basement of the new residence hall. Mosley said that the center will be a place for students to come together and socialize, as well as a place for students to work on their own or in groups.

"I am excited about the new student center," Mosley said. "I think it will be a great space for students to hang out and have fun."

The new student center is scheduled to open in the fall of 2014. Mosley said that the center will be available to students for use throughout the year.
