**Radio Rumors:**

**Arnold to ‘governate’ Rider airwaves**

According to some unreliable sources, it is rumored that the “Governator” himself, Arnold Schwarzenegger, wants to come to Rider and host a show on WRRC, Rider’s radio station. The actor-turned-politician has consistently called into one of Rider’s top radio shows, the Full House Variety Hour on Wednesday nights from 11 p.m. to midnight, screaming and demanding time on Rider’s airwaves. Arnold has shared some great thoughts with host Secret Turtle, including “Stop whining” and “Who is your daddy and what does he do?” When Schwarzenegger calls in, he always seems to want to talk over Turtle as if it were his show and his time to shine. In addition to this evidence, there have been other signs that Arnold would like to come here and do a show. That evidence and the sources that provided it are classified and not to be revealed to the public for safety reasons.

A Rider alum, has done a respectable job in her career, she is only known by people living in the Tri-State Area. However, with a celebrity like Arnold Schwarzenegger — who is well-known not only nationwide, but also worldwide — Rider could greatly improve the quality of all the programs currently have radio shows on WRRC and could attract more listeners. Currently, there is one radio per University, as it would certainly gain a lot of attention. Currently, there is one radio personality associated with Rider. This celebrity is Chris Rollins of 94.5 PST. While Rollins, a Radio personality associated with Rider. This celebrity is Chris Rollins of 94.5 PST. While Rollins, a Rider alum, has done a respectable job in her career, she is only known by people living in the Tri-State Area. However, with a celebrity like Arnold Schwarzenegger — who is well-known not only nationwide, but also worldwide — Rider could be put on the map like never before.

Schwarzenegger’s interest in Rider would not only benefit the University in a “name” capacity, but also in a financial capacity. Imagine the possibilities! Schwarzenegger plans on donating millions of dollars to WRRC to get the newest equipment at the best quality and to increase the wattage of the station’s power. WRRC’s current 50 watts only allows people in the C-Lot and parts of the O-Lot to listen. According to those same unreliable sources, Schwarzenegger plans to increase the wattage so much that all Californians would be able to hear his weekly show.

In addition to the University benefiting from Schwarzenegger’s shows on WRRC, the current DJs and talk-show hosts at the station could learn a lot from the “Governator.” He has much wisdom and knowledge to offer the students who currently have radio shows on WRRC and could greatly improve the quality of all the programs on the schedule. I know for a fact that a few of the current WRRC DJs are thrilled about the possibility of Schwarzenegger coming to Rider, including Turtle, “Big” Willy Style and Helfer Ransom.

I hope President Josiah Rozinski does his best to get Schwarzenegger to Rider as soon as possible. The advantages are plenty and the disadvantages are non-existent. So I say to you, Mr. President, get Schwarzenegger here pronto! And in the words of the man himself: DO IT NOW!

---

**This Week in the Future**

**April 1, 2007**

President George W. Bush will order a large-scale nuclear assault, destroying the entire Middle East. When asked to explain, Bush will shrug and reply, “April Fools?”

**April 4, 3042**

Phase 2 of construction on Rider’s Lawrenceville campus will be completed.

**April 5, 2015**

After his emotional lead in the remake of Harold and Kumar Go to White Castle, Carrot Top will win his first-ever Academy Award. In related news, Hell will freeze over.

**April 7, 2006**

A Rider student, Stall Journal in hand, will burst into class and proclaim, “The only thing worth reading in this paper is the security briefs! Am I right? I mean, am I right?” After an uncomfortable silence, the student will then resume sucking at life.

**The Scatologist:**

**I loves me the goose crap**

Hide your clean, super-white shoes but don’t pull your sandals out just yet because it’s the best season of the year — goose crap season! Weren’t you just sick of the freezing, unforgiving, snowy winter season? Didn’t cancelled classes, winter break and skiing just get annoying after a while? Well, fear no more because Old Man Winter has met his match. No, it’s not just the annual change in weather during March. It’s what comes with it.

That’s right, goose crap! Goose crap season is definitely my favorite part of the year. Neither spending time with family nor vacationing on the beach can compare with the sweet stench of goose crap.

It isn’t just any kind of crap either. This isn’t the disgusting, smelly, brown stuff that comes out of you and me. It’s actually nature’s way of saying “hello” and “careful not to get your shoes dirty.” Imagine all the delicious-looking, perfectly cone-shaped, dirty.” Imagine all the delicious-looking, perfectly cone-shaped, beautiful as the animal that produces it. It also serves as an excellent fertilizer to help the grass grow and as a great conversation piece for University tour guides. I know the enormous amount of goose crap on the Rider grounds was one of the main reasons I decided to come here.

Luckily, someone at Rider University had the genius idea to put a lake in the middle of campus not too far from student pathways. It’s as beautiful as the animal that produces it. It also serves as an excellent fertilizer to help the grass grow and as a great conversation piece for University tour guides. I know the enormous amount of goose crap on the Rider grounds was one of the main reasons I decided to come here.

So, the next time you’re walking through some primitive, pathways. It’s Rider’s prime location in muggy, not-too-cold New Jersey that brings all the wonderful geese here. It’s what comes with it.

It isn’t just any kind of crap either. This isn’t the disgusting, smelly, brown stuff that comes out of you and me. It’s actually nature’s way of saying “hello” and “careful not to get your shoes dirty.” Imagine all the delicious-looking, perfectly cone-shaped, green logs freshly made this morning by beautiful, graceful and beautiful goose. Dinkin Donuts ain’t got crap on this stuff, no pun intended.

Goose crap can’t just come out of an ugly duckling. It’s as beautiful as the animal that produces it. It also serves as an excellent fertilizer to help the grass grow and as a great conversation piece for University tour guides. I know the enormous amount of goose crap on the Rider grounds was one of the main reasons I decided to come here.
